Fastrack Adds Real-Time Batch Eligibility To New Release

Plainview, NY...Fastrack Healthcare Systems, inc. announced today the immediate availability of enhancements to their Version 2010 software release. Our key feature is Real-Time Batch Eligibility through the provider's choice of two leading clearinghouses, Emdeon and ZirMed.

"Fastrack introduced real time eligibility checking for Medicare, Medicaid and commercial payers several years ago. The "Batch" eligibility adds the ability to look ahead at orders and rentals scheduled for future delivery and verify the patient's eligibility. Checking eligibility in a real-time batch mode for all rentals or recurring supply orders for a certain time period adds a new level of efficiency to this process," states Spencer Kay, President of Fastrack.

The Fastrack System automatically separates the responses by individual patient which can easily be printed or viewed and posted to the patient's note file. The system performs eligibility checks by patient, order, scheduled orders, rentals and/or procedure code including the ability to select a range of service dates. As well the system tracks the last eligibility check for each to ensure the next check is current.

A Fastrack eligibility screen maintains the status of each request by submitted, received or posted along with appropriate remarks.

COMPETITIVE BIDDING

To accommodate CMS regulations that adjust payments for power-driven wheelchairs under the Medicare Part B DMEPOS fee schedule, Fastrack added a Rental Reduction Percent section on the Medicare profile screen, containing two new fields, Month 1-3, and Remaining Months. Providers can

now set up their own percentages based on Medicare regulations at the same time they are performing this task.

Additional new features in the new version include greater efficiencies in the cash posting application, enhanced reporting including new patient statistics and Depreciation/Fixed Asset Management reporting, added capabilities in the Business Intelligence for analyzing orders and accounts receivable, allergy to latex check between patient and products being dispensed, new functionality in Point of Sale, custom fax letters for CMNs and the availability to create more custom forms from templates.

New features and enhancements were incorporated throughout the Fastrack Enterprise HME, Infusion Pharmacy and Home Healthcare Agency Systems.

Fastrack is the leading supplier of software & technology to Home Medical Equipment providers, Durable Medical Equipment, Respiratory Providers, Home Infusion Pharmacies & Home Healthcare Agencies. Only Fastrack offers a solution for each individual segment of Home Care as well as one system encompassing virtually every clinical, operational and financial aspect of a provider's business, offering several or all of these product/service lines within one integrated Microsoft SQL database.
